

Photoshop 7: Basic Image Optimization for the Web AKA: Reducing Your Students' Frustration Due to Download Time!

1. Open the image file in Adobe Photoshop.
2. Click on **File**→**Save for Web**.
3. In either the 4-up or the 2-up view, click on the **Image Size** tab. Enter the new width or height.
4. Click on **Apply**.

Now you are able to compare the picture quality, file sizes, and download times given below each of three optimized pictures (original shown in top, left frame). Click on the file you wish to save, and then click on **Save**.

Name the file—use a name different from the original file name so you don't overwrite your original image—and click on **Save**.
